Dear Chairman Cochran, Vice Chairwoman Mikulski, Chairman Rogers, and Ranking Member Lowey:

The undersigned organizations write in strong opposition to the inclusion of the Abortion Non-Discrimination Act (ANDA), or similar language, in a year-end funding agreement. ANDA is an extreme, poison pill rider that would undermine women's ability to obtain abortion care, including in life-threatening circumstances.

In the *Hobby Lobby* decision, the sharply-divided Supreme Court allowed certain bosses' beliefs to trump women's health. Like the result in *Hobby Lobby*, ANDA would allow women's health and lives to come second to the beliefs of others—with dangerous results for women. It would radically expand the Weldon Amendment, a harmful annual appropriations rider that already obstructs access to abortion care. ANDA would create a new right for health care entities to refuse to “participate in” abortion care—“participate in” is a vague term that could result in a hospital turning away a woman in a life-threatening situation who needs emergency abortion care or a health care provider refusing to give her complete information about her health, including whether abortion is a treatment option. Not only that, it would open the door to frivolous lawsuits by allowing a wide range of individuals and entities to sue in federal court in order to block a range of policies that help ensure women have access to abortion.

Opponents of women's health should not add yet another dangerous policy rider that undermines women's access to comprehensive reproductive care, including access to safe and legal abortion. This latest effort is just the most recent attempt in this year's unprecedented number of attacks on women's health. We urge you to reject any effort to include any version of this destructive language in the spending package.

Sincerely,
